

STENMAR Group

Hydraulic Support Services

Hydraulic safety

- Full isolation of hydraulic power
- Instant operation
- Bleeds residual pressure
- Lockable
- Maintains de-energized state

Award-winning Australian design

Compliance with **AS4024.1, MDG41 & MDG3007**

Simplifies & standardises isolation

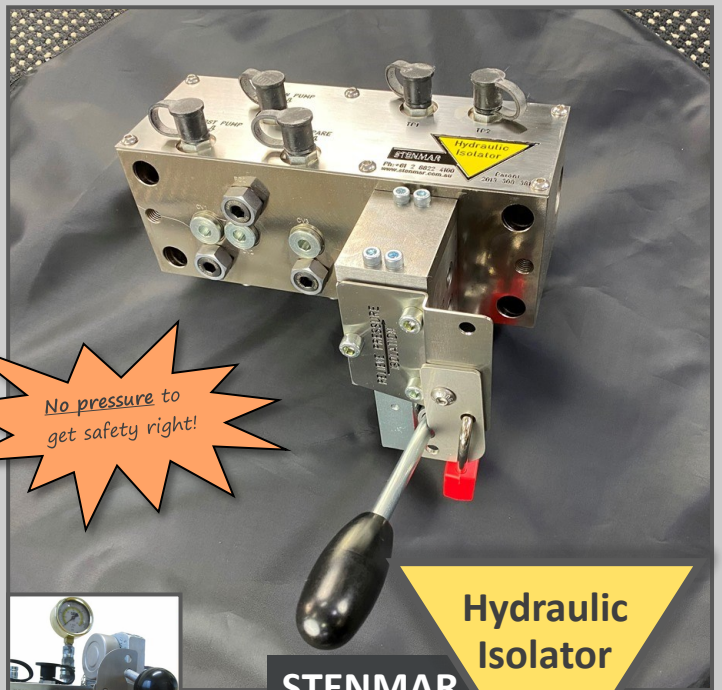

Optional integration with emergency fire systems

Installation available

Single and multi-point:

1, 2, 3, 5, 7, 13, 15 and 17 bank designs

[Others available on request]

STENMAR

Hydraulic Isolator

Oil pressure injection protection

When hydraulic equipment needs to be quickly and reliably isolated from pressure and residual danger, this system ensures rapid response.

Optional electrical interface.

Compatible with your existing safety systems.

Fully engineered to withstand very high system pressures.

Provides central hydraulic system diagnostic point.

Hydraulic safety isolation—simple reliable asset protection and compliance:

Excavators | Mining Equipment | Industrial machinery | Mobile hydraulics

Patented design—ref **2013 308 381**

P: 02-88224100 F: 02-96218200
